EFFECTS OF OVEREXPOSURE:
There are no significant health hazards from vinyl compound at ambient temperature. Inhalation of decomposition or combustion products, especially hydrogen chloride, will cause irritation of the respiratory tract, eyes and skin. Depending on the severity of exposure, physiological response will be coughing, pain and inflammation. Individuals with bronchial asthma and other types of chronic respiratory diseases may develop bronchospasm if exposure is prolonged.

SECTION 3: COMPOSITION/INFORMATION ON INGREDIENTS

INGREDIENT: All ingredients are bound-up in the manufacturing process and are not expected to create any hazard in handling or use. Finished goods are inert. Fence, Railing, Sheds, Lineal Fence Parts.

SECTION 4: FIRST AID MEASURES

If irritation persists from exposure to decomposition products, remove the affected individual from the area. Provide protection before reentry

SECTION 5: FIRE-FIGHTING MEASURES

Flashpoint: Not applicable to solid products.
Ignition Temperature: PVC > 730°F (>388°C)
Flammable Limits in Air (% by volume): Lower – N/A; Upper – N/A
Extinguishing Media: Water spray, ABC dry chemical, AFFF, protein type air foams. Carbon dioxide may be ineffective on larger fires due to a lack of cooling capacity, which may result in reignition.
Firefighting Instructions: Wear positive pressure self-contained breathing apparatus (SCBA). Personnel not having suitable respiratory protection must leave the area to prevent significant exposure to toxic combustion gases from any source. In enclosed or poorly ventilated areas, wear SCBA during clean-up immediately after a fire as well as during the attack phase of firefighting operations.

SECTION 6: ACCIDENTAL RELEASE MEASURES

Material is inert. Place into a container for reuse or disposal.

SECTION 8: EXPOSURE CONTROLS/PERSONAL PROTECTION

Ventilation:
Provide efficient exhaust at all operations capable of creating fumes or vapors. Cutting or sawing, machining, heat welding, thermofolding and other operations involving heat sufficient to result in degradation should be examined to ensure adequate ventilation.

Respiratory Protection:
Not normally required. If overheating results in decomposition resulting in smoke or fumes a NIOSH/MSHA approved combination high efficiency particulate filter with organic vapor cartridge can be used. Gross decomposition may require the use of a positive pressure self-contained breathing apparatus.

Protective Equipment:
Wear safety glasses.
